

# MUGANESHWARAN K

Aspiring SOC Analyst | Cybersecurity Fresher

Salem, Tamil Nadu, India | +91-7603894020 | muganesh1434@gmail.com | [LinkedIn](#) | [GitHub](#) | [HackTheBox Profile](#)

## PROFESSIONAL SUMMARY

Final-year B.Tech (AI & Data Science) student and cybersecurity fresher seeking a SOC Analyst role. Built a self-directed home lab to learn practical security monitoring — including a Splunk/Sysmon log pipeline and a segmented Cisco network — to apply classroom concepts hands-on. Completed a virtual internship in cloud security and incident response with Google Cloud, and practice offensive-security fundamentals on HackTheBox (Pro Hacker rank, 100+ machines). Comfortable with Python, PowerShell, and Linux.

## TECHNICAL SKILLS

- **SIEM & Threat Analysis:** Splunk Enterprise, Sysmon, SPL/KQL, Log Analysis, Incident Response, Threat Hunting
- **Offensive Security:** Nmap, Metasploit, Burp Suite, Privilege Escalation, OWASP Top 10, Active Directory Attack Paths
- **Network Defense:** Cisco IOS, Routing & Switching, Wireshark, VLAN Segmentation, Extended ACLs, Port Security, Syslog
- **Cloud & Infrastructure:** Google Cloud Platform (Security Command Center), Linux Administration, Windows Server Core, Active Directory Concepts
- **Scripting & Automation:** Python, PowerShell, Bash/Shell Scripting

## PROFESSIONAL EXPERIENCE

### Intern – Cloud Security & Incident Response

Sep 2024 – Dec 2024

Google Cloud (Virtual)

Remote

- Monitored and triaged simulated cloud-based security incidents, applying threat detection principles across Google Cloud infrastructure using Security Command Center and cloud-native logging tools.
- Investigated alert pipelines and cloud audit logs to identify indicators of compromise (IOCs), unauthorized access attempts, and misconfigured IAM policies.
- Documented incident response workflows and contributed to playbook development for common cloud threat scenarios.
- Earned specialized certifications in cloud security, incident response, and threat analysis upon program completion.

### Intern – Data Science & Python

Jun 2024 – Aug 2024

Wings Technologies

Salem, India

- Used Python and Jupyter Notebooks to process, clean, and analyze structured datasets, developing foundational scripting skills applicable to security automation and log parsing.

## PERSONAL PROJECTS (HOME LAB)

### Enterprise SIEM & Telemetry Pipeline (Home Lab)

Splunk, Sysmon, Windows Server Core, Kali Linux

- Engineered a localized Security Operations Center (SOC) environment across a virtualized NAT network using Windows Server Core and Kali Linux to minimize resource overhead.
- Deployed Sysmon with the SwiftOnSecurity ruleset to capture high-fidelity endpoint telemetry covering process creation, network connections, and file modifications.
- Configured Splunk Universal Forwarders via PowerShell to route encrypted logs to a centralized Splunk Indexer over port 9997.
- Authored custom SPL queries to detect simulated reconnaissance techniques, lateral movement, and malicious network traffic patterns.

### Secure Enterprise Network Architecture

Cisco IOS, Packet Tracer, ACLs, VLANs

- Designed a multi-department enterprise network using Cisco routers and multilayer switches with full Inter-VLAN routing.
- Implemented MAC-based Port Security with automatic shutdown violation enforcement to restrict unauthorized endpoint access.
- Engineered Extended Access Control Lists (ACLs) to enforce least-privilege inter-departmental traffic filtering.
- Integrated centralized logging by configuring all network devices to forward security events to a simulated Syslog server.

### Offensive Security & Threat Emulation

HackTheBox, Nmap, Metasploit, Burp Suite

- Completed 100+ machines on HackTheBox, achieving Pro Hacker rank through exploitation of real-world vulnerabilities including OWASP Top 10, privilege escalation, and Active Directory attack chains.
- Reverse-engineered attack execution flows to identify endpoint/network telemetry generated during a breach, informing detection rule development.
- Applied TTPs from the MITRE ATT&CK framework to simulate adversarial behavior in isolated lab environments.

## EDUCATION

### B.Tech in Artificial Intelligence and Data Science

Expected May 2026

Ganesh College of Engineering, Salem

CGPA: 7.2 / 10

## CERTIFICATIONS

- Wireshark: The Ultimate Hands-On Course – Aug 2024
- Python Basics – Sep 2023
- Linux Operating System for Beginners – Apr 2021

## ADDITIONAL EXPERIENCE

- **Billing Operator, Reliance Retail** (Mar 2024–Dec 2025): Managed transaction integrity and customer relations in a high-volume retail environment.
- **Supervisor, Minister White** (Dec 2020–May 2022): Oversaw daily operations and team management.
